

Activity 1: Github Repository Creation

<https://github.com/nyaa271>

1. After you make an Account in github, it will appear the home page and you need to click the new on upper left of the page.

2. You need to put a name in your Repository Name and optional to check the box of “Read-me File” to put information for your repository.

The screenshot shows the GitHub 'Create a new repository' page. At the top, there's a search bar and navigation links for Pull requests, Issues, Marketplace, and Explore. The main heading is 'Create a new repository'. Below it, a subtext says 'A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)'

The form has several sections:

- Owner:** A dropdown menu showing 'nyaa271'.
- Repository name:** A text input field containing 'Creating Repository in Github' with a green checkmark icon.
- Great repository names:** A note stating 'Your new repository will be created as Creating-Repository-in-Github. ee-octo-fortnight?'
- Description (optional):** A text input field.
- Visibility:** Two radio buttons: 'Public' (selected) and 'Private'.
- Initialize this repository with:** A section with a checkbox 'Add a README file' which is checked. Below it, a note says 'This is where you can write a long description for your project. [Learn more.](#)'
- Add .gitignore:** A section with a dropdown menu showing '.gitignore template: None'.
- Choose a license:** A section with a dropdown menu showing 'License: None'.
- Default branch:** A note stating 'This will set main as the default branch. Change the default name in your [settings.](#)'
- Warning:** A note stating 'You are creating a public repository in your personal account.'
- Create repository:** A green button at the bottom.

3. After you create the Repository, it will appear the page of your repository and to add file, you need to click the add file.

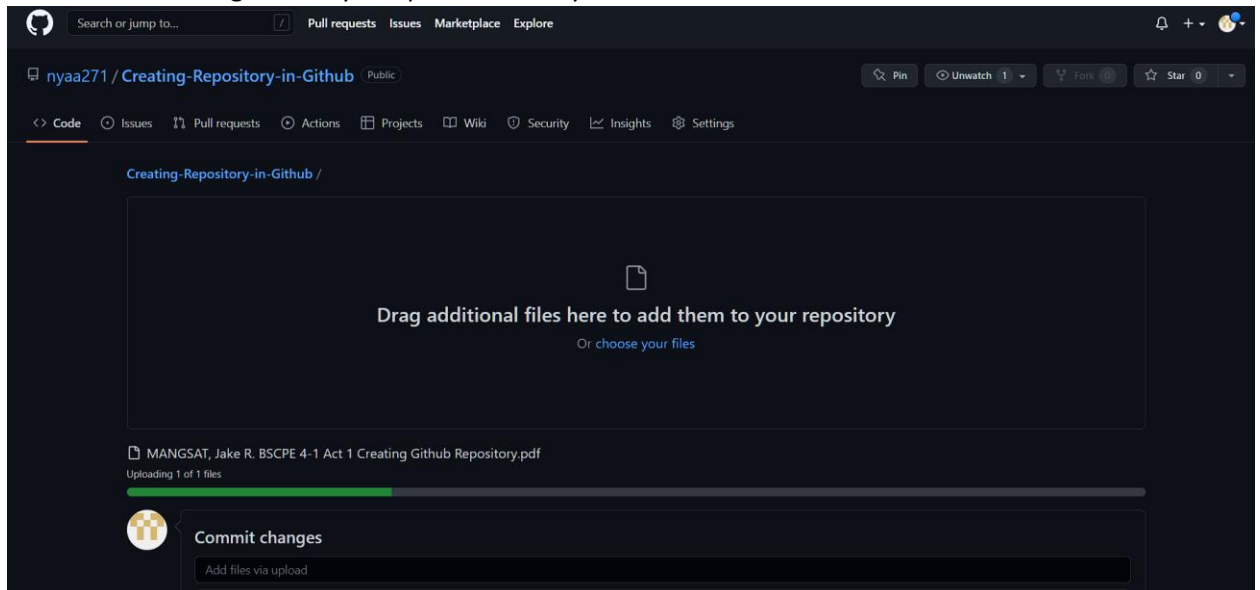

The screenshot shows the GitHub repository page for 'nyaa271 / Creating-Repository-in-Github'. The page is public and has 0 stars, 1 watching, and 0 forks. The repository has a README file.

The main content area shows the README file with the text 'Creating-Repository-in-Github'.

The right sidebar contains the following sections:

- About:** No description, website, or topics provided.
- Readme:** A link to the README file.
- Stars:** 0 stars.
- Watching:** 1 watching.
- Forks:** 0 forks.
- Releases:** No releases published. [Create a new release](#)
- Packages:** No packages published. [Publish your first package](#)

- The Upload section will appear, and you need to drag the file and drop to the box of the Github. Click Commit Changes after you upload all files you need.

- And done, you just create your repository in github.
